P2800N

**Intelligent Cash & Coin
Deposit Machine**

Large capacity

Non-stop deposit

Advanced NV technology

Serial number tracking (opt.)

Biometric authentication

The P2800N is the latest GRGBanking's deposit machine comprised of high speed processing and large deposit capacity. With state-of-the-art technologies such as self auditing, banknote validation, biometric authentication, serial number tracking and other advanced technologies, the versatile P2800N would be an ideal solution for retail cash & coin management and CIT service optimization. It can be applied in any scenario where big volume cash & coin transactions take place to deliver a more efficient and secure currency management service.

P2800N Intelligent Cash & Coin Deposit Machine

Features

Unrivaled Innovation: The P2800N can be configured with the latest GRGBanking cash processing technologies, such as biometric authentication, self-auditing and cash moving within the safe. The 3rd gen self-developed cash processing module of GRGBanking on P2800N supports regular bundle cash deposit, as well as continuous bulk cash deposit through bypassing the escrow.

Serial Number Tracking: With OCR (Optical Character Recognition) technology for cash tracing and tracking, the P2800N can record serial numbers of processed notes, and therefore avoid the difficulties of account reconciliation, cash fraud, and other deceptive actions for financial institutions.

Premier Security: The P2800N contains a UL291 Level 1 safe and is ready for CENIV design. With an optional vibration alarm and remote monitoring software solution, it ensures a secure transaction environment. Biometric authentication is also available on the P2800N to make KYC process convenient, reliable and secure.
